

Calvert Social Index Fund: A Shares

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Large Growth	MORNINGSTAR BOX
The Fund seeks to match the performance of the Calvert Social Index®, which measures the investment return of large- and mid-capitalization stocks.	The Fund employs a passive management strategy designed to track, as closely as possible, the performance of the Calvert Social Index. The Fund uses a replication index method, investing in the common stock of each company in the Index in about the same proportion as represented in the Index itself. The Calvert Social Index measures the performance of those companies that meet the sustainable and socially responsible investment criteria and that are selected from the universe of approximately the 1,000 largest U.S. companies, based on total market capitalization, included in the Dow Jones Total Market Index. The Index is reconstituted once a year based on an updated list of the 1000 largest U.S. companies, and is reviewed quarterly to adjust for sustainable and responsible investment criteria and other factors.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of stocks held by the Fund may fall. An index fund has operating expenses; a market index does not. Although expected to track its target index as closely as possible while satisfying its investment criteria, the Fund will not be able to match the performance of the index exactly. It is not possible to invest directly in an index. Large-cap companies may be unable to respond quickly to new competitive challenges, such as changes in technology, and also may not be able to attain the high growth rate of successful smaller companies, especially during periods of economic expansion.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.

Net assets include all share classes.

Calvert funds are available at NAV for RIAs and Wrap Programs. Not all funds available at all firms.
