

Calvert Capital Accumulation Fund: I Shares

| OBJECTIVE | STRATEGY | MORNINGSTAR CATEGORY: Medium Growth | MORNINGSTAR BOX |
|--|---|---|---|
| The Fund seeks to provide long-term capital appreciation by investing primarily in mid-cap stocks that meet the Fund's investment criteria, including financial, sustainability and social responsibility factors. | The Fund invests primarily in the common stocks of mid-size U.S. companies. The Fund currently defines mid-cap companies as those whose market capitalization falls within the range of the Russell Midcap Growth Index. Sub-advisor New Amsterdam favors companies which have an above market average prospective growth rate, but sell at below market average valuations. New Amsterdam evaluates each stock in terms of its growth potential, the return for risk free investments, and the risk and reward potential for the company to determine a reasonable price for the stock. The Fund seeks to invest in companies and other enterprises that demonstrate positive environmental, social and governance performance as they address corporate responsibility and sustainability challenges. | The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth). |  |

Equity holdings only. Return calculation is based on daily holding periods and excludes all fund expenses and trading costs. Portfolio weight is calculated as the average weight over the quarter.

The performance data quoted represents past performance, which does not guarantee future results. Current performance may differ from that shown. The statistical information above is taken from sources believed to be reliable but cannot be guaranteed as to accuracy.

Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of stocks held by the Fund may fall; individual investments of the Fund may not perform as expected; and/or the Fund's portfolio management practices may not achieve the desired result. Prices of mid-cap stocks may respond to market activity differently from and can be more volatile than those of larger, more established companies. Mid-cap companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies. The Fund is non-diversified and may be more volatile than a diversified fund.

From January 18, 2002 to June 3, 2003, there were no Class I shareholders in the Calvert Capital Accumulation Fund. Performance results for Class I shares during this period reflect the performance of Class A shares at NAV (i.e., without deduction of any front-end sales charge). Actual Class I share performance would have been higher than Class A share performance because Class I has lower class-specific expenses than Class A.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.

Net assets include all share classes.

Calvert funds are available at NAV for RIAs and Wrap Programs. Not all funds available at all firms.
