

Calvert Large Cap Value Fund: A Shares

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Large Value	MORNINGSTAR BOX
The Fund seeks long-term capital appreciation through investment primarily in large-cap U.S. common stocks that are trading at prices below what are believed to be their intrinsic value, in accordance with the Fund's corporate responsibility standards and strategies.	The Fund offers opportunities for long-term growth of capital through investments in large-cap company equity securities that the portfolio manager believes are undervalued. The Fund normally invests at least 80% of its net assets in the common stocks of large-cap companies, as defined by those within the range of market capitalizations of the Russell 1000 Value Index. The Advisor seeks to identify common stocks of companies it believes are significantly undervalued compared to their perceived worth or prospects, historical valuations or the general market level of valuation. The Advisor primarily uses a bottom-up approach focused on fundamental analysis of issuers in a number of different sectors and industries, in light of the issuers' current financial condition and industry position, as well as market, economic, political and regulatory conditions. The Fund has threshold responsibility standards with respect to tobacco, weapons and human rights, which it applies in determining whether a security qualifies for investment.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of stocks held by the Fund may fall; individual investments of the Fund may not perform as expected; and/or the Fund's portfolio management practices may not achieve the desired result. The Fund's value-oriented investing approach may fall out of favor with investors from time to time, during which the Fund may underperform other funds using different investment approaches. In addition, the market may not recognize a security's intrinsic value for a long time, or a stock judged to be undervalued may actually be appropriately priced, and it may not appreciate as anticipated. Large-cap companies may be unable to respond quickly to new competitive challenges, such as changes in technology, and also may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

Class A and Class I shares of the Everest Fund of Summit Mutual Funds, Inc. were reorganized into the Class A and Class Y shares, respectively, of Calvert Large Cap Value Fund, which commenced operations on 12/12/08. Performance results for Class A and Class Y shares of Calvert Large Cap Value Fund prior to 12/12/08 reflect the performance of Class A and Class I shares, respectively, of the Everest Fund since their inception on 12/29/99.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.

Net assets include all share classes.

Calvert funds are available at NAV for RIAs and Wrap Programs. Not all funds available at all firms.
