

Calvert Global Energy Solutions Fund: A Shares

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Medium Blend	MORNINGSTAR BOX
The Fund seeks long-term growth of capital through investment in equity securities of companies active in the alternative energy sector, in accordance with the Fund's corporate responsibility standards and strategies.	The Fund normally invests at least 80% of its net assets in equity securities of U.S. and non-U.S. companies whose main business is alternative energy or that are significantly involved in the alternative energy sector. Alternative energy includes renewable energy (solar, wind, geothermal, biofuel, hydrogen, biomass and other renewable energy sources that may be developed in the future), technologies that enable these sources to be tapped, and services or technologies that conserve or enable more efficient use of energy. The Fund invests in securities of all market capitalizations, but may contain more small- and mid-cap stocks than large-cap stocks because many alternative energy companies are relatively new. Sub-advisor Kleinwort Benson Investors International Ltd. employs long-term strategic allocations for each sub-activity within the alternative energy sector, and uses fundamental and qualitative models to evaluate stocks from the bottom up, focused on fundamental analysis of stocks across all geographic regions. Top-down views on industries, sectors or regions act as risk controls in portfolio construction. The Sub-advisor consults a panel of experts in the alternative energy field to obtain research and insight on political, economic and regional trends with respect to alternative energy segments.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

The performance data quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Performance assumes the reinvestment of all distributions, and reflects the deduction of fund expenses and applicable fees. Indices reflect no deductions for fees or expenses. An investor cannot invest directly in an index. Returns for periods of less than one year are not annualized.

Equity holdings only. Return calculation is based on daily holding periods and excludes all fund expenses and trading costs. Portfolio weight is calculated as the average weight over the quarter.

The performance data quoted represents past performance, which does not guarantee future results. Current performance may differ from that shown. The statistical information above is taken from sources believed to be reliable but cannot be guaranteed as to accuracy.

Investment in mutual funds involves risk, including the possible loss of principal invested. The Fund is subject to the risk that stocks that comprise the energy sector may fall in value, and the risk that prices of energy (including traditional sources such as oil, gas or electricity) or alternative energy may fall. The alternative energy sector can be significantly affected by a number of factors, including fluctuations in energy prices, supply and demand of alternative energy fuels, energy conservation, and government regulations and policies. A downturn in the alternative energy industry would impact the Fund more than a fund that does not concentrate in this industry, and the Fund therefore may be more volatile than a typical mutual fund. Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations. The Fund is non-diversified and may be more volatile than a diversified fund.

Allocation percentages may not add to 100% due to rounding. Negative Cash positions may occur as the result of varying settlement schedules for securities.

Calvert Investments does not provide tax advice, and nothing on this site should be construed as tax advice. Before acting on any such information, consult your own accountant or tax advisor.

Calvert mutual funds are underwritten and distributed by Calvert Investment Distributors, Inc., member FINRA and subsidiary of Calvert Investments, Inc.

Companies labeled GICS are those classified using the Global Industry Classification Standards. These companies are involved in alternative energy (though not to the degree required per prospectus definition) and the sub-advisor believes will generate above average returns going forward.

For more information on any Calvert fund, please contact your financial advisor, call Calvert at 800.368.2748, or download a free summary prospectus and/or prospectus. An institutional investor should call Calvert at 800.327.2109. An investor should consider the investment objectives, risks, charges and expenses of an investment carefully before investing. The summary prospectus and prospectus contain this and other information. Read them carefully before you invest or send money.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.

Net assets include all share classes.
