

Calvert VP SRI Mid Cap Growth Portfolio

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Medium Growth	MORNINGSTAR BOX
The Portfolio seeks to provide long-term capital appreciation by investing primarily in a portfolio of the equity securities of mid-cap companies that are undervalued but demonstrate a potential for growth and that meet the Portfolio's investment criteria, including financial, sustainability and social responsibility factors.	The Portfolio normally invests at least 80% of its net assets in the common stocks of mid-cap companies, as defined by those whose market capitalization falls within the range of the Russell MidCap Growth Index. Sub-advisor New Amsterdam favors companies which have an above market average prospective growth rate, but sell at below market average valuations. New Amsterdam evaluates each stock in terms of its growth potential, the return for risk free investments, and the risk and reward potential for the company to determine a reasonable price for the stock. The Portfolio seeks to invest in companies and other enterprises that demonstrate positive environmental, social and governance performance as they address corporate responsibility and sustainability challenges.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

PERFORMANCE

Average Annual Returns (%) for Period Ended 12/31/2014

	QTR	YTD	1 YEAR	3 YEARS	5 YEARS	10 YEARS	SINCE INCEPTION	INCEPTION DATE
Portfolio	5.87	8.09	8.09	17.91	17.14	8.02	8.42	7/16/1991
Russell Midcap Growth Index	5.84	11.90	11.90	20.71	16.94	9.43	10.42	
Lipper VA Mid-Cap Growth Funds Average	5.29	0.40	6.81	18.26	15.00	8.41	8.76	

The performance data quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Index reflects no deductions for fees or expenses. An investor cannot invest directly in an index. Returns for periods of less than one year are not annualized. Performance assumes the reinvestment of all distributions, and reflects the deduction of fund expenses and applicable fees, but does not reflect fees and charges imposed under the variable annuity and life insurance contracts through which an investment may be made. If these fees and charges were included, they would reduce these returns.

Equity holdings only. Return calculation is based on daily holding periods and excludes all fund expenses and trading costs. Portfolio weight is calculated as the average weight over the quarter.

The performance data quoted represents past performance, which does not guarantee future results. Current performance may differ from that shown. The statistical information above is taken from sources believed to be reliable but cannot be guaranteed as to accuracy.

Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Portfolio or the Portfolio could underperform because of the following risks: the stock market may fall in value, causing prices of stocks held by the Portfolio to fall; individual investments of the Portfolio may not perform as expected; and/or the Portfolio's portfolio management practices may not achieve the desired result. Prices of mid-cap stocks may respond to market activity differently from and can be more volatile than those of larger, more established companies. Mid-cap companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies. The Portfolio is non-diversified and may be more volatile than a diversified fund.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.
