

Calvert Small Cap Fund: A Shares

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Medium Value	MORNINGSTAR BOX
The Fund seeks to provide long-term capital appreciation through investment primarily in small-cap common stocks of U.S. companies that meet the Fund's investment criteria, including financial, sustainability, and social responsibility factors and that, at the time of purchase, are considered by the Advisor to be attractively valued.	The Fund offers opportunities for long-term capital appreciation with a moderate degree of risk through a mix of smaller company stocks that meet the Fund's investment criteria, including financial, sustainability and social responsibility factors. The Fund normally invests at least 80% of its net assets in common stocks of small-cap companies. The Fund's investment process seeks to add value by using the Advisor's fundamental, quantitative, and macro-economic research and analyses while integrating the Advisor's proprietary views on material environmental, social and governance ("ESG") information as part of its risk and opportunity assessment. The portfolio construction process seeks to maximize the benefit of these insights while managing the Fund's risk profile relative to the benchmark, and minimizing transaction costs. The Fund seeks to invest in companies and other enterprises that demonstrate positive environmental, social and governance performance as they address corporate responsibility and sustainability challenges. The Fund defines small-cap companies as those within the range of market capitalizations of the Russell 2000 Index.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

The performance data quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Index reflects no deductions for fees or expenses. An investor cannot invest directly in an index. Visit www.calvert.com to obtain performance data current to the most recent month-end. Returns for periods of less than one year are not annualized.

Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of stocks held by the Fund may fall; the individual investments of the Fund may not perform as expected; and/or the Fund's portfolio management practices may not achieve the desired result. Prices of small cap stocks can be more volatile than those of larger, more established companies. Small cap companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies.

Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.

Net assets include all share classes.

Calvert funds are available at NAV for RIAs and Wrap Programs. Not all funds available at all firms.
