

## Calvert Global Water Fund: A Shares

OBJECTIVE	STRATEGY	MORNINGSTAR CATEGORY: Medium Blend	MORNINGSTAR BOX
The Fund seeks growth of capital through investment in equity securities of companies active in the water-related resource sector, in accordance with the Fund's corporate responsibility standards and strategies.	The Fund normally invests at least 80% of its net assets in equity securities of U.S. and non-U.S. companies whose main business is in the water sector or are significantly involved in water related services or technologies. Investments in the water-related resource sectors and companies include: water treatment, engineering, filtration, environmental controls, water related equipment, water and wastewater services, and water utilities. The Fund invests in securities of all market capitalizations, but may contain more small- and mid-cap stocks than large-cap stocks because many water-related resource companies are relatively new. Sub-advisor Kleinwort Benson Investors International Ltd. combines quantitative (initial screening and evaluation) and fundamental processes. The fundamental process focuses on company strength, growth, and cash flow measures, taking into account sustainable and socially responsible investing initiatives and policies. Top-down views on industries, sectors or regions act as risk controls in portfolio construction.	The Morningstar Style Box™ depicts a fund's current investment strategy. For equity funds, the vertical axis shows the market capitalization of the stocks owned; the horizontal axis shows investment style (value, blend, or growth).

The performance data quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Index reflects no deductions for fees or expenses. An investor cannot invest directly in an index. Visit [www.calvert.com](http://www.calvert.com) to obtain performance data current to the most recent month-end. Returns for periods of less than one year are not annualized.

Investment in mutual funds involves risk, including the possible loss of principal invested. The Fund is subject to the risk that stocks that comprise the water-related sector may fall in value. The water industry can be significantly affected by a number of factors, including availability of water, the level of rainfall, water consumption, price and supply fluctuations, and government regulations and policies. A downturn in the water-related resource sector would impact the Fund more than a fund that does not concentrate in this industry, and the Fund therefore may be more volatile than a typical mutual fund. Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations. The Fund is non-diversified and may be more volatile than a diversified fund.

*Companies labeled GICS are those classified using the Global Industry Classification Standards. These companies are involved in the water industry (though not to the degree required per prospectus definition) and the sub-advisor believes will generate above average returns going forward.*

*Holdings are as of the date shown above, may change at any time and are not recommendations to buy or sell any security.*

*Net assets include all share classes.*

*Calvert funds are available at NAV for RIAs and Wrap Programs. Not all funds available at all firms.*
